# PLAY with ME!

Parent-Child Activity Manuals for Home Visits with 3 & 4 Year-Olds

## OVER 400 ACTIVITIES FOR KIDS AND THEIR FAMILIES

These developmentally appropriate activities, combined with love, laughter, and fun, will support joyful interactions between children and their parents to create the kinds of childhoods that prepare kids for all that awaits them in life.

## ORGANIZED BY 7 LEARNING DOMAINS

- Approaches to Learning
- Social & Emotional Development
- Language & Communication
- Literacy
- Scientific Reasoning
- Mathematics
- Perceptual, Motor, & Physical Development

## SCOPE & SEQUENCE

Many areas of human development follow documented sequences whereby new abilities, skills, and knowledge build on those that have already been acquired. By matching the developmental abilities of each child, as well as preferences and interests of the child and their family, parents are supported to find as many opportunities as possible to engage in learning with their child.

## CAN BE USED WITH EITHER GGK P-36 MONTHS OR GGK FOR PRESCHOOLERS

These parent-child activity manuals are part of the GGK™ for Preschoolers curriculum, but they are also available for use by anyone who is GGK™ certified in either our Prenatal to 36 Months or Preschool versions.

The decision to add these manuals to your existing GGK™ curricula sets will expand your program's reach and extended family engagement in activities.

## ACTIVITY MATERIALS EASILY FOUND IN MOST HOMES

The activities require very few supplies and those that are required are easily accessible. Parents will learn that great fun and learning can be created with what they have on hand.

## ACTIVITIES DEVELOPED BY & FOR HOME VISITORS

These activities were created by people who do exactly what home visitors do. Much thought has gone into what works to engage parents and their children in lots of joyful, home-based interaction.
